Education

The University of Mississippi Aug 2023 – Expected May 2027
Bachelor of Science in Computer Science, Minor in Management *University, MS*
GPA: 4.00

Projects

FantasyX | ***Flutter, Supabase, Firebase, PostgreSQL*** Apr 2026 – Present
- Co-founded and architected FantasyX end-to-end as sole engineer, shipping a cross-platform Flutter app across 3 platforms (iOS, Android, web) on a Supabase/PostgreSQL backend supporting 4 sign-in methods
- Engineered a real-time weekly re-draft scoring engine and 10+ Supabase Edge Functions automating waivers, trades, and a 3-flow email sync between Supabase and Brevo for transactional and marketing communication
- Authored GDPR/CCPA/CAN-SPAM-compliant Privacy Policy and Terms of Service documents governing all user data collection and communication ahead of public launch

Muscle Map: Interactive Training Web App | **React, HTML/CSS, JS, Firebase** Aug 2026 – Nov 2026
- Built a solo project through 6 iterative stages, migrating a static HTML website with jQuery and Firebase site into 40+ reusable components with a 6-route React Router architecture
- Engineered a two-step interactive anatomy map (body region, then muscle) that loads exercise data from Firestore, with a state-driven SVG zoom/spotlight and keyboard-accessible navigation
- Built a responsive, semantic, ARIA-labelled UI in a reduced-motion-aware design and Firebase Auth & Firestore

FitForge: AI Personal Trainer App | **Flutter, Dart, Firebase** Jan 2026 – Apr 2026
- Led a 3-person agile development team as Mobile Lead and Team Leader, coordinating sprint planning, task
- Architected a cross-platform Flutter app featuring AI-powered personal coaching, macro tracking, and adaptive
- Established Git repository structure, branching conventions, and version control workflows to ensure smooth collaboration across the team

Experience

Co-Founder & Lead Software Engineer Apr 2026 – Present
FantasyX Inc. *New York, NY*
- Architect a cross-platform Flutter app on a Supabase/PostgreSQL backend, powering a real-time draft and scoring engine across 4 authentication methods
- Build and automate backend infrastructure, deploying 10+ Supabase Edge Functions and a 3-flow sync keeping email compliant in real time
- Author GDPR/CCPA/CAN-SPAM-compliant Privacy Policy and Terms of Service governing all user data
- Diagnose and resolve production and release issues independently, from OAuth misconfigurations to platform compliance requirements

Computer Science Lab Leader and Tutor Jan 2025 – Present
The University of Mississippi *University, MS*
- Explain complex algorithms to 20+ students weekly and debugging Java/Python, elevating average assignment scores by 30%
- Provide student feedback to professors, enabling proactive adjustment to lectures and materials
- Evaluate 40+ weekly submissions against coding standards, providing feedback that reduced recurring errors

Leadership and Campus Involvement

ACM, President | ***The University of Mississippi*** Aug 2024 – Present
- Organize and lead weekly technical sessions, improving members' problem-solving speed on coding challenges
- Recruit new members by organizing coding workshops, which increased club membership by 15% last semester

Counter-Strike eSports Team, Captain | ***The University of Mississippi*** Aug 2024 – Present
- Schedule and facilitate 5+ hour weekly practices focused on in-game economy strategy and team coordination
- Analyze match footage to develop opponent-specific strategies, which led the team to a top 3 finish in the regional collegiate league

Technical Skills

Languages: Java, JavaScript, C/C++, C#, SQL, Python, HTML/CSS, Dart, PHP
Frameworks/Libraries: OpenGL, PyQt5, Flutter, A-Frame, Three.js, Riverpod, Deno
Developer Tools: Git, Maven, pip, JUnit, MariaDB, VS Code, IntelliJ, Firebase, Supabase, QStash, Cloudflare
Relevant courses: Game Development, Object-Oriented Programming, Mobile App Development, Software Development
